

The charge of Free2move eSolutions powers up Key Energy 2025

- Key Energy 2025, a leading event for renewable energy and sustainable mobility in the Italian market, provided a platform for Free2move eSolutions to present its innovative charging solutions.

Milan, 10 March 2025 – Free2move eSolutions concludes its participation at **Key Energy 2025**, the premier international event dedicated to renewable energy and sustainable mobility, held in Rimini from 5 to 7 of March, engaging with industry professionals and showcasing its latest charging solutions.

Throughout the exhibition, Free2move eSolutions showcased its cutting-edge charging solutions, reaffirming its commitment to accelerating the transition towards a cleaner, more accessible, and efficient electric mobility ecosystem. The company, a joint venture between Stellantis and NHOA, presented its latest technologies designed to meet the needs of private users, businesses, and fleet managers, ensuring smart and seamless charging experiences.

Visitors to **Hall A3, Stand 507** had the opportunity to explore Free2move eSolutions' **full range of products**, including the **easyWallbox**, the **eProWallbox**, the **eLuxWallbox** as well as the **latest digital solutions**. Each product is designed to maximize flexibility, connectivity, and ease of use, catering to the diverse demands of the e-mobility sector.

This year's Key Energy placed a strong focus on **smart cities, energy transition, and zero-emission mobility**, themes that are fully aligned with Free2move eSolutions' mission to drive innovation in sustainable transportation.

As the electric vehicle market continues to grow, Free2move eSolutions remains committed to providing state-of-the-art solutions that make e-mobility more accessible and efficient for all. With its presence at Key Energy 2025, the company has once again demonstrated its leadership in shaping the future of sustainable mobility.

Free2move eSolutions

Free2move eSolutions is a joint venture between Stellantis and NHOA, founded to support and facilitate the transition to electric mobility, by taking an active role in achieving accessible, clean mobility. To do so, it provides a wide range of consumers with innovative, tailor-made services that contribute to reducing CO₂ emissions.
