

## Free2move eSolutions and Free2move Charge partner with Plugsurfing to deliver a smarter, more connected charging experience for EV drivers across Europe

- Partnership ensures customers benefit from a seamless and reliable public charging ecosystem
- Over 1 million charging points available to all customers across Europe

Milan-Berlin, 9 September 2025 — Free2move eSolutions and Free2move Charge, the two electrification business units of **Stellantis Group**, one of the world's leading automotive companies, have announced a strategic partnership with **Plugsurfing**, one of Europe's largest managed roaming providers, to deliver enhanced charging services and an intuitive digital experience to electric drivers across the continent.

Through the integration of Plugsurfing's Drive API, Free2move Charge App and eSolutions Charging App have been upgraded to offer Stellantis customers seamless access to over 1 million charging points across Europe for slow, fast, and ultrafast charging.

Customers now enjoy many benefits enabled by Plugsurfing's Drive API, including:

- Real-time station data and availability, to help users plan their charging stops efficiently
- Transparent pricing across networks, visible before charging begins
- Remote start/stop of charging sessions via smartphone
- Centralized billing and payment through the app
- Seamless roaming across more than 1 million charging points in Europe

Plugsurfing's network covers the vast majority of Europe's public charging infrastructure. The new integration allows Free2move eSolutions and Free2move Charge to **maintain full ownership of the customer relationship** while connecting to this comprehensive charging ecosystem.

"With this new partnership, our customers benefit from the confidence of being connected to one of the most extensive and reliable public charging networks in Europe," said **Mathilde Lheureux**, CEO of Free2move eSolutions and Head of the Free2move Charge Business Unit. "We are not only expanding access—we are elevating the experience. From real-time availability to simplified payments and remote control of charging sessions, we're putting full control in the hands of drivers, wherever they are in Europe."

"We're proud to join forces with Stellantis in shaping the future of EV charging," said **Tom Rowlands**, Managing Director of Global EV Solutions at Corpay, which owns Plugsurfing. "Our combined efforts are focused on delivering seamless charging experiences. While Stellantis pioneers vehicle innovation, Plugsurfing ensures drivers are connected to an expansive and reliable charging network across Europe."
