## **Free2Move eSolutions and Jeep® Wrangler 4xe, working together towards sustainable development, offer ALL-e electric charging solutions**

- **To provide Jeep® Wrangler 4xe customers with a truly carefree mobility experience, Free2Move eSolutions has developed a series of solutions – forming part of ALL-e – to make it as easy as possible to manage electric charging of the new plug-in hybrid version of the Jeep icon**
- **Courtesy of these integrated mobility packages, a single monthly fee will enable Wrangler 4xe customers to charge their cars at public charge points and at home, with the aim of making the Wrangler 4xe experience even more comprehensive**
- **In its 4xe plug-in hybrid version, the Jeep Wrangler can deliver 380 horsepower, with its combination of a 2.0-litre Turbo petrol engine and an electric motor**

The international media drive in which the new Jeep® Wrangler 4xe demonstrated its inimitable qualities in everyday use in the city and its renowned off-road capabilities has just drawn to a close: the brand's icon in its 4xe plug-in hybrid version is the most powerful, efficient, sustainable and technically advanced model ever.

The new Jeep® Wrangler 4xe has a plug-in hybrid powertrain, offering the option of driving in zero-emissions full-electric mode and range that can exceed 50 km in the urban cycle. Courtesy of the union of the expertise of Jeep and Free2Move eSolutions (the joint venture between Stellantis and Engie EPS, established with the aim of becoming an international leader in the design, manufacturing and supply of e-mobility products and services), integrated solutions forming part of the ALL-e charging offers have been created with a single common goal: the most straightforward and comprehensive customer experience.

With the two mobility packages on offer, Basic and Evo, Wrangler 4xe customers will be able to charge their car at the public charge points and at home, for a single monthly fee.

Basic includes the safe, high-performance easyWallbox – the easy-to-use and easy-to-install charging system – equipped with a built-in cable and charging for 2,000 km available at over 75% of the public charge points in Italy.

Evo is the all-inclusive version, including the easyWallbox and professional installation (so customers can fast charge the car at up to 7.4 kW), with the increase in energy that can be delivered at home and 100% green energy supply courtesy of the partner operator Wekiwi.

**18 June 2021**

Even better, with Evo, the energy for private and public charging covers 4,000 km of journeys per year, all full-electric. With this package, customers can benefit from the government incentive to reimburse 50% of the costs: this scheme will be managed in full by Free2Move eSolutions, to provide a stress-free experience for customers, who will only pay the amount net of the incentive.

Both offers also include the installation of easyCounter, a device to monitor the consumption related to vehicle charging.

All the information you could need is now available at [www.all-e.com](http://www.all-e.com) and will soon also be put up on [www.jeep-official.it](http://www.jeep-official.it), as well as throughout the Jeep dealership network in Italy.

### **Information on Free2Move eSolutions**

Free2Move eSolutions is a joint venture between Stellantis and Engie EPS, aimed at becoming a leader in the design, development, manufacturing and distribution of electric mobility products. In a spirit of innovation and as a precursor, the company will guide the transition to new forms of electric mobility, to contribute to reductions in CO<sub>2</sub> emissions.

Free2Move eSolutions is therefore a new international technological player, which can count on a team with great skills and specific knowledge, with the ability to offer innovative, easy and affordable mobility solutions. With its amazing technological innovation, its advanced digitisation and its forward-looking approach, Free2Move eSolutions aims to simplify the transition to a more sustainable mobility. For more information, go to [www.esolutions.free2move.com](http://www.esolutions.free2move.com).
